

2nd DIGITAfrica Consultation Workshop

April 28, 2026, Tunis

The DIGITAfrica Workshop organised in Tunis brings together public policymakers, research leaders, technical experts, and African and European partners to advance a shared vision for pan-African, sustainable digital research infrastructures and stronger cross-continental collaboration.

The morning sessions set the strategic context, presenting the DIGITAfrica vision, the European research infrastructure framework, and perspectives on the research landscape in Tunisia. A dedicated panel then explores the conditions for enabling pan-African research collaboration, including the landscape, funding, and partnership opportunities. Afternoon sessions showcase DIGITAfrica Blueprints and proof-of-concepts, and the cooperation with SLICES and SoBigData, the two European Research Infrastructures liaising with the DIGITAfrica initiative. The programme also discusses national perspectives on digital research strategies and infrastructures, as well as skills and capacity building.

The workshop concludes discussing a call to action for organizations to become early adopters of DIGITAfrica Blueprints, translating shared priorities into a co-designed approach, operational cooperation and long-term impact through sustainable deployment.
