

Objectives

- 1 Strategic Framework:** Develop a pan-African Research Infrastructure strategy with strong AU-EU impact.
- 2 Community & Partnerships:** Connect African and European initiatives to expand collaboration and opportunities.
- 3 Capacity Building:** Provide tailored training in AI, data, and digital skills.
- 4 Inclusive Participation:** Support women and early-career researchers in digital sciences.
- 5 Collaborative Platform:** Create a shared “playground” for joint research and innovation.
- 6 Sustainability:** Ensure long-term governance and durable AU-EU cooperation.

About our project

DIGITAfrica is a European project aiming to co-construct a comprehensive pan-African Research Infrastructure in Digital Sciences. Focused on innovation, collaboration, and capacity building, it empowers African researchers and institutions in AI, machine learning, advanced computing, and telecommunications.

By fostering partnerships between African and European stakeholders, DIGITAfrica bridges the digital divide, promotes open science, and drives sustainable technological progress.

Aligned with the African Union’s priorities and key frameworks such as Agenda 2063, the Digital Transformation Strategy for Africa, and STISA-2024, DIGITAfrica is committed to addressing Africa’s digital and research needs.

Get involved with **DIGITAfrica**

DIGITAfrica invites stakeholders to contribute their expertise and help shape a pan-African RI in Digital Sciences. You can engage by:

- **Sharing scientific and technical inputs** to support strategy development and address key challenges.
- **Joining the AU-EU Network of RI**, strengthening collaboration across Africa and Europe.
- **Accessing platforms** such as BluePrint, SLICES, and SoBigData to test tools and conduct joint research.
- **Participating in workshops and training initiatives**, including capacity-building programmes.
- **Subscribing** to our mailing list for updates and opportunities.

Together, we are building an inclusive and sustainable digital research ecosystem across Africa.

Towards a Comprehensive Pan-African Research Infrastructure in Digital Sciences

DIGITAfrica **Partners**

DIGITAfrica brings together five African Union partners, seven EU partners, and one associated country partner, working together to share knowledge and drive impact.
