

Towards a Comprehensive Pan-African Research Infrastructure in Digital Sciences

This project is co-funded by the European Union and Switzerland under the EU Horizon Europe research and innovation Programme. (GA 10118796)

About DIGITAfrica

DIGITAfrica aims to co-construct a comprehensive pan-African Research Infrastructure in Digital Sciences. It promotes innovation, collaboration, and capacity building in AI, computing, and telecoms, empowering African researchers and institutions.

By connecting African and European stakeholders, it bridges the digital divide, supports open science, and drives sustainable technological progress, while addressing Africa's digital and research needs, in alignment with AU priorities such as Agenda 2063 and STISA-2024.

Objectives

- 1 Strategic Framework**
Develop a pan-African research infrastructure strategy with strong AU-EU impact
- 2 Capacity Building**
Provide tailored training in AI, data, and digital skills
- 3 Collaborative Platform**
Create a shared “playground” for joint research and innovation
- 4 Community & Partnerships**
Connect African and European initiatives to expand collaboration and opportunities
- 5 Inclusive Participation**
Support women and early-career researchers in digital sciences
- 6 Sustainability**
Ensure long-term governance and durable AU-EU cooperation
